What the public record says about each CFD input (n = 112; * critical)
G1 Enclosure dimensions *
G2 Specimen-chamber volume or dimensions *
G3 Specimen layout / number of units
F1 Ventilation mode (forced / passive / sealed) *
F2 Airflow rate or velocity *
E1 Temperature at specimen *
E2 Relative humidity
E3 Gas composition / CO2-O2 control
E4 Pressure
E5 Lighting (type, flux or darkness)
B1 Specimen types *
B2 Nutrient / water delivery
B3 Specimen gas-exchange / metabolic load
T1 Heat load / power
W1 Wall / membrane gas permeability
